

COSHOCTON CITY SCHOOLS

TECHNOLOGY, COMPUTER, NETWORK AND INTERNET ACCEPTABLE USE POLICY (AUP)

INTRODUCTION:

Coshocton City Schools is pleased to make available access to interconnected computer systems within the district and the worldwide network to provide various means of accessing educational materials.

The following Acceptable Use Policy is created to ensure that the technology available through *Coshocton City Schools* provides a safe learning environment for our staff and students.

This policy is reviewed and updated yearly to remain current with changes in federal and state legislation as well as technology enhancements and is part of the student handbook.

The Acceptable Use Policy (AUP) is signed annually. A signed AUP is required for use of the District's computer and networking equipment. If you do not want your student to have access to these resources, you must submit in writing a request for no computer privileges.

POLICY PURPOSE:

The purpose of this policy is to ensure school-level compliance with policies and guidelines concerning the use of Coshocton's technology equipment for educational purposes (*Coshocton Board of Education Policies 5136, 7540, 7540.01, 7540.02, 7540.03, 7540.06, 7542*). All activities that use our computer systems, whether they are during or after school, are covered by this policy. Use of a personal computing device follows the same guidelines as a school computer when connected to the network.

POLICY CHANGES:

The school policies may be altered by action of Coshocton City School Board of Education at any of its regular meetings.

NETWORK & INTERNET USE AGREEMENT:

Network and Internet access is coordinated through a complex association of government agencies, regional, and state networks. The smooth operation of the network relies upon the proper conduct of the end users who must take responsibility for appropriate ethical and legal use of this access. Internet access for *Coshocton City Schools* is a privilege, not a right. The signatures on the *Acceptable Use Policy* are legally binding and indicate the parties who signed have read the terms and conditions carefully and understand their significance. (Appendix A)

COMPUTER TECHNOLOGY AND NETWORKS

The Board of Education is committed to the effective use of technology to both enhance the quality of student learning and the efficiency of operations within the school system.

However, the use of the District's network and technology resources by students is a privilege, not a right. As a prerequisite, students and their parents must sign and submit a *Student Network and Internet Acceptable Use and Safety* form annually. (See also, Policy 7540.03)

The Superintendent shall develop and implement a written District Technology Plan (DTP). Procedures for the proper acquisition of technology shall be set forth in the DTP. The DTP shall also provide guidance to staff and students about making safe, appropriate and ethical use of the District's network(s), as well as inform both staff and students about disciplinary actions that will be taken if Board technology and/or networks are abused in any way or used in an inappropriate, illegal, or unethical manner.

Further safeguards shall be established so that the Board's investment in both hardware and software achieves the benefits of technology and inhibits negative side effects. Accordingly, students shall be educated about appropriate online behavior including, but not limited to, using social media to interact with others online; interacting with other individuals in chat rooms or on blogs; and, recognizing what constitutes cyberbullying, understanding cyberbullying is a violation of District policy, and learning

appropriate responses if they are victims of cyberbullying.

Social media shall be defined as internet-based applications (such as Facebook, MySpace, Twitter, et cetera) that turn communication into interactive dialogue between users. The Board authorizes the instructional staff to access social media from the District's network, provided such access has an educational purpose for which the instructional staff member has the prior approval of the Principal. However, personal access and use of social media, blogs, or chat rooms from the District's network is expressly prohibited and shall subject students and staff members to discipline in accordance with Board policy.

The Board authorizes the access and use of social media from the District's network to increase awareness of District programs and activities, as well as to promote achievements of staff and students, provided such access and use is approved in advance by the Superintendent.

The Superintendent shall review the DTP and make any changes, amendments or revisions.

STUDENT TECHNOLOGY ACCEPTABLE USE AND SAFETY:

Technology has fundamentally altered the ways in which information is accessed, communicated, and transferred in society. As a result, educators are continually adapting their means and methods of instruction, and the way they approach student learning, to incorporate the vast, diverse, and unique resources available through the Internet. The Board of Education provides Technology Resources (as defined in Bylaw 0100) to support the educational and professional needs of its students and staff. With respect to students, District Technology Resources afford them the opportunity to acquire the skills and knowledge to learn effectively and live productively in a digital world. The Board provides students with access to the Internet for limited educational purposes only and utilizes online educational services/apps to enhance the instruction delivered to its students. The District's computer network and Internet system does not serve as a public access service or a public forum, and the Board imposes reasonable restrictions on its use consistent with its limited educational purpose.

The Board regulates the use of District Technology Resources by principles consistent with applicable local, State, and Federal laws, the District's educational mission, and articulated expectations of student conduct as delineated in the Student Code of Conduct. This policy and its related administrative guidelines and the Student Code of Conduct govern students' use of District Technology Resources and students' personal communication devices when they are connected to the District computer network, Internet connection, and/or online educational services/apps, or when used while the student is on Board-owned property or at a Board-sponsored activity (see Policy 5136).

Users are required to refrain from actions that are illegal (such as libel, slander, vandalism, harassment, theft, plagiarism, inappropriate access, and the like) or unkind (such as personal attacks, invasion of privacy, injurious comment, and the like). Because its Technology Resources are not unlimited, the Board has also instituted restrictions aimed at preserving these resources, such as placing limits on use of bandwidth, storage space, and printers.

Users have no right or expectation to privacy when using District Technology Resources (including, but not limited to, privacy in the content of their personal files, e-mails, and records of their online activity when using the District's computer network and/or Internet connection).

First, the Board may not be able to technologically limit access, through its Technology Resources, to only those services and resources that have been authorized for the purpose of instruction, study and research related to the curriculum. Unlike in the past when educators and community members had the opportunity to review and screen materials to assess their appropriateness for supporting and enriching the curriculum according to adopted guidelines and reasonable selection criteria (taking into account the varied instructional needs, learning styles, abilities, and developmental levels of the students who would be exposed to them), access to the Internet, because it serves as a gateway to any publicly available file server in the world, opens classrooms and students to electronic information resources that may not have

been screened by educators for use by students of various ages.

Pursuant to Federal law, the Board has implemented technology protection measures that protect against (e.g., filter or block) access to visual displays/depictions/materials that are obscene, constitute child pornography, and/or are harmful to minors, as defined by the Children's Internet Protection Act. At the discretion of the Board or the Superintendent, the technology protection measures may be configured to protect against access to other material considered inappropriate for students to access. The Board also utilizes software and/or hardware to monitor online activity of students to restrict access to child pornography and other material that is obscene, objectionable, inappropriate and/or harmful to minors. The technology protection measures may not be disabled at any time that students may be using District Technology Resources, if such disabling will cease to protect against access to materials that are prohibited under the Children's Internet Protection Act. Any student who attempts to disable the technology protection measures will be subject to discipline.

The Superintendent or Technology Director may temporarily or permanently unblock access to websites or online educational services/apps containing appropriate material, if access to such sites has been inappropriately blocked by the technology protection measures. The determination of whether material is appropriate or inappropriate shall be based on the content of the material and the intended use of the material, not on the protection actions of the technology protection measures.

Parents are advised that a determined user may be able to gain access to services and/or resources on the Internet that the Board has not authorized for educational purposes. In fact, it is impossible to guarantee students will not gain access through the Internet to information and communications that they and/or their parents may find inappropriate, offensive, objectionable or controversial. Parents of minors are responsible for setting and conveying the standards that their children should follow when using the Internet.

Pursuant to Federal law, students shall receive education about the following:

- A. safety and security while using e-mail, chat rooms, social media, and other forms of direct electronic communications
- B. the dangers inherent with the online disclosure of personally identifiable information
- C. the consequences of unauthorized access (e.g., "hacking", "harvesting", "digital piracy", "data mining", etc.), cyberbullying and other unlawful or inappropriate activities by students online, and
- D. unauthorized disclosure, use, and dissemination of personally- identifiable information regarding minors

Staff members shall provide instruction for their students regarding the appropriate use of technology and online safety and security as specified above. Furthermore, staff members will monitor the online activities of students while at school.

Monitoring may include, but is not necessarily limited to, visual observations of online activities during class sessions; or use of specific monitoring tools to review browser history and network, server, and computer logs.

Building principals are responsible for providing training so that Internet users under their supervision are knowledgeable about this policy and its accompanying guidelines. The Board expects that staff members will provide guidance and instruction to students in the appropriate use of District Technology

Resources. Such training shall include, but not be limited to, education concerning appropriate online behavior, including interacting with other individuals on social media, including in chat rooms, and cyberbullying awareness and response. All users of District Technology Resources (and their parents if they are minors) are required to sign a written agreement to abide by the terms and conditions of this policy and its accompanying guidelines.

Students will be assigned a school e-mail account that they are required to utilize for all school-related electronic communications, including those to staff members, peers, and individuals and/or organizations outside the District with whom they are communicating for school-related projects and assignments. Further, as directed and authorized by their teachers, they shall use their school-assigned e-mail account when signing-up/registering for access to various online educational services, including mobile applications/apps that will be utilized by the student for educational purposes.

Students are responsible for good behavior when using District Technology Resources – i.e., behavior comparable to that expected of students when they are in classrooms, school hallways, and other school premises and school sponsored events. Communications on the Internet are often public in nature. General school rules for behavior and communication apply. The Board does not approve any use of its Technology Resources that is not authorized by or conducted strictly in compliance with this policy and its accompanying guidelines.

Students may only use District Technology Resources to access or use social media if it is done for educational purposes in accordance with their teacher's approved plan for such use.

Users who disregard this policy and its accompanying guidelines may have their use privileges suspended or revoked, and disciplinary action taken against them. Users are personally responsible and liable, both civilly and criminally, for uses of District Technology Resources that are not authorized by this policy and its accompanying guidelines.

The Board designates the Superintendent and Principals as the administrators responsible for initiating, implementing, and enforcing this policy and its accompanying guidelines as they apply to students' use of District Technology Resources.

DISTRICT WEB PAGE

The Board of Education authorizes the creation of web sites by employees and students of the School District to be published on the World Wide Web. The creation of web sites by students must be done under the supervision of a professional staff member. These web sites must reflect the professional image of the District, its employees, and students. The content of all pages must be consistent with the Board's Mission Statement and is subject to prior approval of the Superintendent or designee. The purpose of such web sites is to educate, inform, and communicate. The following criteria should be used to guide the development of such web sites:

A. Educate

Content provided in the web site should be suitable for and usable by students and teachers to support the curriculum and the Board's Objectives as listed in the Board's Strategic Plan.

B. Inform

Content may inform the community about the school, teachers, students, or departments, including information about curriculum, events, class projects, student activities, and departmental policies.

C. Communicate

Content may communicate information about the plans, policies and operations of the District to members of the public and other persons who may be affected by District matters.

The information contained on the web site should reflect and support the Board's Mission Statement, Educational Philosophy, and the School Improvement Process.

When the content includes a photograph or information relating to a student, the Board will abide by the provisions of Policy 8330 - Student Records.

All links included on the pages must also meet the above criteria and comply with State and Federal law (e.g. copyright laws, Children's Internet Protection Act).

Under no circumstances is a web site to be used for commercial purposes advertising, political lobbying or to provide financial gains for any individual. Included in this prohibition is the fact no web pages contained on the District's web site may: (1) include statements or other items that support or oppose a candidate for public office, the investigation, prosecution or recall of a public official, or passage of a tax levy or bond issue; (2) link to a web site of another organization if the other web site includes such a message; or (3) communicate information that supports or opposes any labor organization or any action by, on behalf of, or against any labor organization.

Pages should reflect an understanding that both internal and external audiences will be viewing the information.

School web sites must be located on Board-affiliated servers.

The Superintendent shall prepare administrative guidelines defining the standards permissible for web-site use.

The Board retains all proprietary rights related to the design of web sites and/or pages that are hosted on the Board's servers, absent written agreement to the contrary.

Students who want their class work to be displayed on the Board's web site must have written parent permission and expressly license its display without cost to the Board.

Prior written parental permission is necessary for a student to be identified by name on the Board's website.

COPYRIGHT-MULTI-MEDIA MATERIAL:

Coshocton City Schools encourages the use of electronic media in student and staff projects but the following guidelines must be followed to be acceptable.

- a. Any audio or video clip, whether downloaded or copied from home, must be limited to 10% or 30 seconds for music or 10% or 3 minutes for video, whichever is less. If a longer duration is needed, you must have permission by the owner to redistribute.
- b. Any inclusion of copied Internet material, such as, text, video, audio, or images, must include proper credit to the copyright holder or the work is subject to student rules regarding plagiarism.

DISTRICT-ISSUED STUDENT E-MAIL ACCOUNT:

Students assigned a school e-mail account are required to utilize it for all school-related electronic communications, including those to staff members and individuals and/or organizations outside the District with whom they are communicating for school-related projects and assignments. Further, as directed and authorized by their teachers, they shall use their school-assigned e-mail account when signing-up/registering for access to various online educational services, including mobile applications/apps that will be utilized by the student for educational purposes.

This policy and any corresponding guidelines serve to establish a framework for student's proper use of e-mail as an educational tool.

Personal e-mail accounts on providers other than the District's e-mail system may be blocked at any time if concerns for network security, SPAM, or virus protection arise. Students are expected to exercise reasonable judgment and prudence and take appropriate precautions to prevent viruses from entering the District's network when opening or forwarding any e-mails or attachments to e-mails that originate from unknown sources.

Students shall not send or forward mass e-mails, even if educationally-related, without prior approval of their classroom teacher or the Technology Director, or Superintendent/Principal.

Students may join list serves or other e-mail services (e.g. RSS feeds) that pertain to academic work, provided the e-mails received from the list serves or other e-mail services do not become excessive. If a student is unsure whether s/he has adequate storage or should subscribe to a list serv or RSS feed, s/he should discuss the issue with his/her classroom teacher, the building principal or the District's Technology Director. The Technology Director or Principal is authorized to block e-mail from list serves or e-mail services if the e-mails received by the student becomes excessive.

Students are encouraged to keep their inbox and folders organized by regularly reviewing e-mail messages and purging e-mails once they are read and no longer needed for school.

The Board does not authorize the use of its Technology Resources, including its computer network ("network"), to accept, transmit, or distribute unsolicited bulk e-mail sent through the Internet to network e-mail accounts. In addition, Internet e-mail sent, or caused to be sent, to or through the network that makes use of or contains invalid or forged headers, invalid or non-existent domain names, or other means of deceptive addressing will be deemed to be counterfeit. Any attempt to send or cause such counterfeit e-mail to be sent to or through the network is unauthorized. Similarly, e-mail that is relayed from any third party's e-mail servers without the permission of that third party, or which employs similar techniques to hide or obscure the source of the e-mail, is also an unauthorized use of the network. The Board does not authorize the harvesting or collection of network e-mail addresses for the purposes of sending unsolicited e-mail. The Board reserves the right to take all legal and technical steps available to prevent unsolicited bulk e-mail or other unauthorized e-mail from entering, utilizing, or remaining within the network. Nothing in this policy is intended to grant any right to transmit or send e-mail to, or through, the network. The Board's failure to enforce this policy in every instance in which it might have application does not amount to a waiver of its rights.

Unauthorized use of the network in connection with the transmission of unsolicited bulk e-mail, including the transmission of counterfeit e-mail, may result in civil and criminal penalties against the sender and/or possible disciplinary action.

PERSONAL COMMUNICATION DEVICES:

For purposes of this policy, "personal communication device" (PCD) includes computers, tablets (e.g., iPad-like devices), electronic readers ("e-readers"; e.g., Kindle-like devices), cell phones, smartphones (e.g., iPhones, Android devices, Windows Mobile devices, etc.), and/or other web-enabled devices of any type.

Students may use PCDs before and after school, during their lunch break, in between classes as long as they do not create a distraction, disruption or otherwise interfere with the educational environment, during after school activities (e.g., extra-curricular activities), or at school-related functions. Use of PCDs, except those approved by a teacher or administrator, at any other time is prohibited and they must be powered completely off (i.e., not just placed into vibrate or silent mode) and stored out of sight. Students may not use PCDs on school property or at a school-sponsored activity to access and/or view Internet web sites that are otherwise blocked to students at school.

Students may use PCDs while riding to and from school on a school bus or other Board-provided vehicles or on a school bus or Board-provided vehicle during school-sponsored activities, at the discretion of the bus driver, classroom teacher, or sponsor/advisor/coach. Distracting behavior that creates an unsafe environment will not be tolerated.)

During after school activities, PCDs shall be powered completely off (not just placed into vibrate or silent mode) and stored out of sight when directed by the administrator or sponsor.

Under certain circumstances, a student may keep his/her PCD "On" with prior approval from the Principal.

Except as authorized by a teacher, administrator or IEP team, students are prohibited from using PCDs during the school day, including while off-campus on a field trip, to capture, record and/or transmit the words or sounds (i.e., audio) and/or images (i.e., pictures/video) of any student, staff member or other person. Using a PCD to capture, record and/or transmit audio and/or pictures/video of an individual without proper consent is considered an invasion of privacy and is not permitted. Students who violate

this provision and/or use a PCD to violate the privacy rights of another person may have their PCD confiscated and held until the end of the school day or a parent/guardian picks it up, and may be directed to delete the audio and/or picture/video file while the parent/guardian is present. If the violation involves potentially illegal activity, the confiscated-PCD may be turned over to law enforcement.

PCDs, including but not limited to those with cameras, may not be activated or utilized at any time in any school situation where a reasonable expectation of personal privacy exists. These locations and circumstances include, but are not limited to, classrooms, locker rooms, shower facilities, rest/bathrooms, and any other areas where students or others may change clothes or be in any stage or degree of disrobing or changing clothes. The Superintendent and Principal are authorized to determine other specific locations and situations where use of a PCD is absolutely prohibited.

Students are expressly prohibited from using covert means to listen-in or make a recording (audio or video) of any meeting or activity at school. This includes placing recording devices, or other devices with one - or two-way audio communication technology (i.e., technology that allows a person off-site to listen to live conversations and sounds taking place in the location where the device is located), within a student's book bag or on the student's person without express written consent of the Superintendent. Any requests to place a recording device or other device with one- or two-way audio communication technology within a student's book bag or on a student's person shall be submitted, in writing, to the Principal. The District representative shall notify the parent(s), in writing, whether such request is denied or granted within five (5) days.

Students shall have no expectation of confidentiality with respect to their use of PCDs on school premises/property.

Students may not use a PCD in any way that might reasonably create in the mind of another person an impression of being threatened, humiliated, harassed, embarrassed or intimidated. See Policy 5517.01 – Bullying and Other Forms of Aggressive Behavior. In particular, students are prohibited from using PCDs to: 1) transmit material that is threatening, obscene, disruptive, or sexually explicit or that can be construed as harassment or disparagement of others based upon their race, color, national origin, sex (including sexual orientation/transgender identity), disability, age, religion, ancestry, or political beliefs; and 2) engage in "sexting" - i.e., sending, receiving, sharing, viewing, or possessing pictures, text messages, e-mails or other materials of a sexual nature in electronic or any other form.

Violation of these prohibitions shall result in disciplinary action. Furthermore, such actions will be reported to local law enforcement and child services as required by law.

Students are also prohibited from using a PCD to capture, record, and/or transmit test information or any other information in a manner constituting fraud, theft, cheating, or academic dishonesty. Likewise, students are prohibited from using PCDs to receive such information.

Possession of a PCD by a student at school during school hours and/or during extra-curricular activities is a privilege that may be forfeited by any student who fails to abide by the terms of this policy, or otherwise abuses this privilege.

Violations of this policy may result in disciplinary action and/or confiscation of the PCD. The Principal will also refer the matter to law enforcement or child services if the violation involves an illegal activity (e.g., child pornography, sexting). Discipline will be imposed on an escalating scale ranging from a warning to an expulsion based on the number of previous violations and/or the nature of or circumstances surrounding a particular violation. If the PCD is confiscated, it will be released/returned to the student's parent/guardian after the student complies with any other disciplinary consequences that are imposed, unless the violation involves potentially illegal activity in which case the PCD may be turned-over to law enforcement. A confiscated device will be marked in a removable manner with the student's name and held in a secure location in the building's central office until it is retrieved by the parent/guardian or turned-over to law enforcement. School officials will not search or otherwise tamper with PCDs in District custody unless they reasonably suspect that the search is required to discover evidence of a violation of the law or other school rules. Any search will be conducted in accordance with Policy 5771 – Search and Seizure. If multiple offenses occur, a student may lose his/her privilege to bring a PCD to school for a designated length of time or on a permanent basis.

A person who discovers a student using a PCD, recording device, or other device with one- or two-way audio communication technology in violation of this policy is required to report the violation to the Principal.

Students are personally and solely responsible for the care and security of their PCDs. The Board assumes no responsibility for theft, loss, or damage to, or misuse or unauthorized use of, PCDs brought onto its property.

Parents/Guardians are advised that the best way to get in touch with their child during the school day is by calling the school office.

Students may use school phones to contact parents/guardians during the school day at approved times with appropriate permission.

TECHNOLOGY PRIVACY

The Board of Education recognizes its staff members' right to privacy in their personal lives. This policy serves to inform staff members of the Board's position with respect to staff-member privacy in the educational and workplace setting and to protect the Board's interests.

All computers, telephone systems, electronic mail systems, and voice mail systems are the Board's property and are to be used primarily for business purposes. The Board retains the right to access and review all electronic and voice mail, computer files, data bases, and any other electronic transmissions contained in or used in conjunction with the Board's computer system, telephone system, electronic mail system, and voice mail system. Staff members shall be notified that they have no expectation that any information contained on such systems is confidential or private.

Review of such information may be done by the Board with or without the staff member's knowledge.

The use of passwords does not guarantee confidentiality, and the Board retains the right to access information in spite of a password. All passwords or security codes must be registered with the Board. A staff member's refusal to permit such access may be grounds for discipline up to and including discharge.

Computers, electronic mail, and voice mail are to be used for business and educational purposes.

Personal messages via Board-owned technology should be limited in accordance with the Superintendent's guidelines. Staff members are encouraged to keep their personal records and personal business at home. Because the Board's computer and voice mail systems are to be used primarily for business and educational purposes, staff members are prohibited from sending offensive, discriminatory, or harassing computer, electronic, or voice mail messages.

Staff members are encouraged to keep their personal records and personal business at home.

The Board is interested in its resources being properly used. Review of computer files, electronic mail, and voice mail will only be done in the ordinary course of business and will be motivated by a legitimate business reason. If a staff member's personal information is discovered, the contents of such discovery will not be reviewed by the Board, except to the extent necessary to determine if the files/e-mail/voice mail constitute a public record or if the Board's interests have been compromised. Any information discovered will be limited to those who have a specific need to know that information.

The administrators and technology staff members authorized by the Superintendent have the authority to search and access information electronically.

All computers and any information or software contained therein are property of the Board. Staff members shall not copy, delete, or remove any information or data contained on the Board's computers/servers without the express permission of the Superintendent or designee or communicate any such information to unauthorized individuals. In addition, staff members may not copy software on any Board computer and may not bring software from outside sources for use on Board equipment without the prior approval of the Technology Coordinator. Such pre-approval will include a review of any copyright infringements or virus problems associated with such outside software.

CONFIDENTIALITY AND STUDENT INFORMATION

Users are responsible for maintaining security of student information and other personally identifiable

data that they access, even if they access such data accidentally or without permission, and for upholding FERPA (20

U.S.C. § 1232g), the student confidentiality law (Ohio Revised Code Section 3319.321), the Ohio Privacy Act (Chapter 1347 of the Ohio Revised Code), and any other applicable privacy policies and regulations. Users are responsible whether such data is downloaded from the Network to their computer screen, transmitted by e-mail, stored on a flash drive, portable device or laptop, copied by handwriting or by any or all other devices, forms of storage or methods. Negligence with respect to protecting the confidentiality of such data will be considered a violation of this Policy whether or not such negligence results in identity theft or other harm.

CONSEQUENCES OF INAPPROPRIATE INTERNET & NETWORK BEHAVIOR:

The staff or student's Building Principal or supervisor will reprimand any staff or student who does not comply with Policies and Guidelines accordingly. User infractions may result in appropriate disciplinary action as outlined in the disciplinary policy for the building/District. Unauthorized use of the network, intentional deletion or damage to files and data belonging to other users, or copyright violations may be termed theft or destruction of school property. In addition to appropriate disciplinary actions, the user may be responsible for any charges, costs, liabilities or damages incurred by *Coshocton City Schools*. This includes (but is not limited to) the cost of time to repair the damaged component, cost of parts to repair the component, or the cost of outside companies to repair damaged components. The district will cooperate fully with local, state, or federal officials in any investigation concerning or relating to any illegal activities conducted using the school's technology. Penalties imposed under applicable federal, state, or local laws will supersede any local penalties.

USER FEE/BREAKAGE FEE(S):

- All students in grades 3-12 will be assessed \$20 for a 1:1 Device User Fee at the beginning of the school year.
- In the event that a student breaks his/her device, the student will be assessed an additional \$20.
- If a student breaks his/her second device, the student will be assessed an additional \$30.
- If a student breaks his/her third device (and any thereafter), the student will be assessed all costs associated with the breakage repair. This may include associated labor costs and full-replacement costs.
- Students who break another student's device will receive consequences from the office which may include financial responsibility.

**Students who have not paid the initial \$20 1:1 Device User Fee prior to their breakage will be assessed all costs associated with the breakage repair. This may include associated labor costs and full replacement costs.

DISTRICT LIABILITIES:

Coshocton City Schools makes no warranties of any kind, whether expressed or implied, for the service it is providing. *Coshocton City Schools* will not be responsible for any damages users may suffer. This includes loss of data resulting from delays, non-deliveries, mis-deliveries, or service interruptions caused by its own negligence or user errors or omissions. Use of any information obtained via the Internet is at the user's risk. *Coshocton City Schools* specifically denies any responsibility for the accuracy or quality of information obtained through its services. The user and parent(s) or guardian(s) agree to cooperate with the school in the event of an investigation of a person's use of computer access to the network, whether that use is on a school computer or on another's outside the district's network.

A copy of these forms and the Board Policy can be found at: www.coshoctonredskins.com.
