Blizzad Bag

Day 1

Mr. Helbling

Standard: 7.NS.1.c Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts.

Learning Target: I can add and subtract integers.

Directions: Use the follow attached resources to help you complete the worksheet on adding and subtracting integers. I have provided you with the following:

- Flow chart for integers
- Khan academy video - https://www.youtube.com/watch?v=C38B33ZywWs
- Practice worksheet
