

Blizzard Bag #1

Mr. Wherley

Physical Science

Targets:

I can identify careers that are related to the study of science

I can describe the nature of the work, the educational and training requirements, employment outlook, working conditions and other necessary information.

Directions:

Using the internet or other sources, list two occupations that are related to the study of chemistry and fill in the chart below for each career. One of the careers you chose must require a four year college degree and the other career will require some type of vocational training, such as an electrician, welder, LPN, dental assistant, etc. There are two pages to this assignment. You may put assignment on your own paper or fill in chart below.
