

CHEMISTRY

Find one current science-related article from a newspaper, internet or magazine. The article can be related to any area of Chemistry including:

Elements and compounds
Uses for various elements or compounds
Chemical reactions
Gases
Nuclear reactions (fission, fusion, radioactive dating)

GUIDELINES:

Typed
Times New Roman Font, size 12
Include the heading.
Must be 3-4 paragraphs long.
Use complete sentences.

Organize your current event as follows:

First and Last Name
Date

Title of Article
Author
Website

Paragraph 1 and 2 (minimum 5 sentences each):

A summary of the article using your own words. Be sure to use helpful background information to help the reader understand what the article is about. Make sure it is an article you understand and are interested in!

Paragraph 3 (minimum 5 sentences):

Write a thoughtful reflection about what you think about the article. Choose one of the following questions to base your reflection off:

- What did you learn that you did not know before?
- How does this relate to what we are learning in science class or another class
- What questions would you ask the author that were not explored in the author?
